3. The following is an examiner's statement of reasons for allowance: The art submitted by the applicant and reviewed in an updated search did not overcome the

reasons for allowance given in the prior allowance dated 8 June 2005 and set forth in a previous office action mailed 4 June 2004 and applicant's amendment filed 18 November 2004. Specifically art such as Sampat et al, US Patent No. 5,557,724 showed a displayed remote control being used to select channels and to control volume, video, audio, and text flow (see figure 13) but it does not suggest "allowing the user to select said one of said displayed channels, wherein said steps of selecting said subject category, selecting said channel and/or selecting said classification is performed by pointing and clicking on a button on a remote control image situated on the users computer screen;" (language of claim 1, claim 7 and 13 have similar limitations except in claim 13 the a language is selected instead of a subject category) nor does Sampat suggest combining in a system with the remaining elements. As for the over all system the examiner still considers Boyer the closest art overall and the as discussed in the reasons previously given it does not show or suggest al the limitations of the claims as currently written.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
